

**Whisper Walls**<sup>®</sup>  
worldwide acoustical solutions

## Endless Design Possibilities...

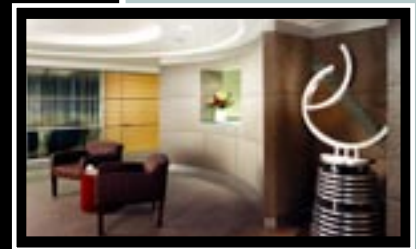

For more than 20 years, Whisper Walls has been the choice of top design professionals by offering the industries most extensive and original site built, fabric covered acoustical solutions. Our products feature unsurpassed design flexibility and can be applied as acoustical, tackable or decorative surfaces.

## Product Line

### WhisperWalls

Whisper Walls is site fabricated to ensure a tailored appearance and superior performance. Mix and match from the industries largest selection of fabric stretching system profiles which include multiple edge conditions and integrated reveals. Precisely tune acoustical performance with standard system thicknesses from 1/2" - 2". Our custom tailored fabric walls adds elegance to any space and the reduction of unwanted noise creates a physical calm.

### WhisperSpan

Unique characteristics create wide-span, fabric covered ceiling and wall surfaces that appear to be lightly textured drywall or plaster but perform acoustically. Install WhisperSpan on flat, angular, curved, coffered or barrel vaulted ceilings and completely change the acoustical properties of a room without changing its appearance. Or, use your imagination and create a dramatic statement that performs as great as it looks.

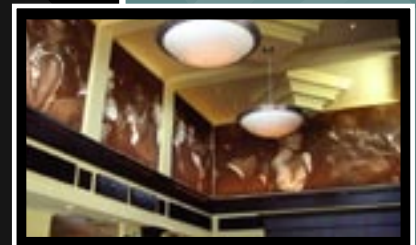

### WhisperArt

WhisperArt is the easiest way to add beauty and acoustical control to any space. WhisperArt is a combination of our specialized high resolution imaging technology, Whisper Walls acoustical control products and our fabric stretching system. WhisperArt comes to you fully assembled and ready to hang on a wall as you would a painting. Add fine art, photography, digital graphics, or any image to your design. WhisperArt is not limited in size, shape or color.

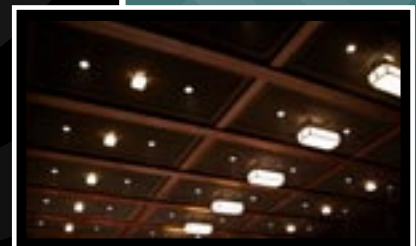

### WhisperMural

Combine the design capabilities found in the Whisper Walls family of products with our high resolution imaging technology to create beautiful and dramatic works of art that are integrated elements of the wall, ceiling, cloud or baffle system. Fine art, photography, digital graphics, or any image now becomes an integral and acoustically functional addition to a designers pallet. WhisperMural is not limited in size, shape or color.

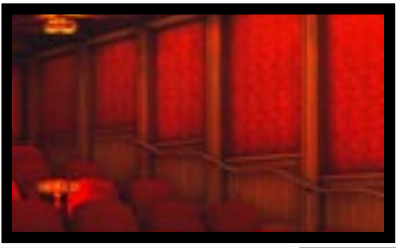

### WhisperCeiling

WhisperCeiling adds the high performance, rich texture and tailored appearance of stretched fabric to any ceiling. Select from our extensive line of profiles to create stunning ceiling elements or add high performance acoustical elements that are designed to blend into their surroundings.

*No Limits... Set Your Imagination Free.*

## WhisperPanels

Make the most of limited space with our affordable, movable, fabric covered tuning panels. These durable sound absorption modules are designed to be moved or removed as needed. Now you can "tune" a single room to fit the specific needs of multiple users. Perfect for use in school music rooms, small theaters and multi function spaces.

## WhisperTak

WhisperTak are durable, maintainable and cost-effective fabric covered tackable panels that add function while maintaining consistency of appearance within a space. These panels come from Whisper Walls fully assembled and ready to hang on the wall surface as you would a picture. Update WhisperTak by simply replacing the fabric, the core and frame remain unchanged.

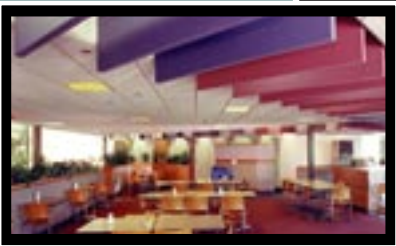

## WhisperCloud

These creative, lightweight, suspended acoustical treatments hang from any ceiling and provide focused or broad sound absorption. The design possibilities are endless; virtually any geometric shape can be achieved in standard and custom thicknesses.

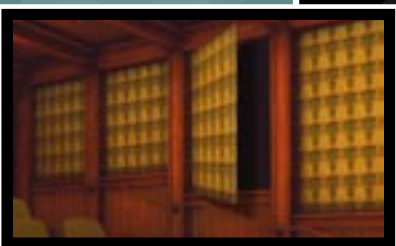

## WhisperVault

A state of the art aluminum structure creates wide span, suspended acoustical ceilings in an almost limitless variety of shapes and sizes. The integrated stretching system is designed to firmly secure virtually any fabric so coordinating interior elements is easy.

## WhisperBaffle

Our baffles have no equal when it comes to design flexibility and maintainability. Each surface can be covered with a different color or style of fabric. Maintain or update each baffle by simply replacing the fabric, the core and frame remain. Hang them independently or join them edge to edge to create a distinct, custom appearance.

## WhisperAccessDoors

WhisperAccessDoors provide useful access to any equipment that needs to be maintained or replaced. A unique hinge system provides hidden functionality allowing each WhisperAccessDoors to appear the same as other fixed fabric elements within the space.

## WhisperSpecialties

For those who desire that little bit extra, a special distinguishing feature to make their design or interior completely unique we offer a service designed to help our customers realize their particular vision. The limitless nature of WhisperSpecialties is that every aspect of the design can be enhanced. Whether it is a custom element, textile or just a personal touch, our team is dedicated to finding solutions for creating a truly one of a kind interior.
