

Description

WhisperSpan™ fabric is a unique, wide-span, open weave and attractive facing material for WhisperSpan™ wide-span acoustical ceiling panels. WhisperSpan™ panels absorb sound with the monolithic, grid-free, appearance of lightly textured drywall or plaster.

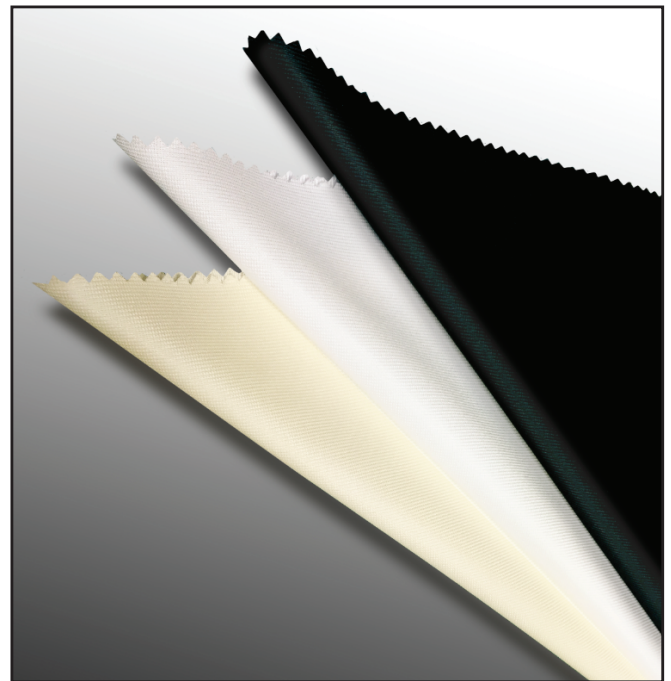

Properties

Wide-span: available in widths up to 16 feet.

Three standard color choices: Black, Vienna Creme and Natural / White. Custom colors available with minimum order.

Open weave for high performance sound absorption.

100% Trevira CS polyester content for excellent stability and fire resistance.

Fire Performance

Class A rated (ASTM E84)

Light Reflectance

Tested on the WhisperSpan™ system. ASTM D2244-16, Standard Practice for Calculation of Color Tolerances and Color Differences from Instrumentally Measured Color Coordinates.
